**About IIMM** : Indian Institute of Materials Management (IIMM) is a premier Institute of the country to promote professional excellence in the field of materials management. It has a pan India presence with a wide network of 52 Branches and 20 Chapters all over the country. IIMM, through its various Educational Courses, Training Programmes, Conferences, Workshops, Seminars, Consultancy Services and In-house Publications - continuously strives to equip the materials management professionals with the latest tools and techniques needed to develop new and innovative approaches in the supply chain domain. The Institute is recognized by the Indian Society for Technical Education (ISTE) under Ministry of HRD. It is a Charter Member of the International Federation of Purchasing and Supply Chain Management (IFPSM), an Umbrella Body of Global Supply Chain Institute, UK, having presence in 40 countries. IIMM has also established Centre for Research in Materials Management (CRIMM) in association with Techno India University of Kolkata to drive in-depth and analytical research in the field of supply chain.

IIMM offers various courses, notable among these are Graduate Diploma in Materials Management, Post Graduate Diploma in Materials Management, Post Graduate Diploma in Supply Chain Management and Logistics, One Year Diploma Course in Materials Management, Logistics Management, Supply Chain Management and E-Commerce.

**About the Course** : The one-year Diploma Course has been specially designed for the participants who wish to pursue their career in Supply Chain Management. The Global Supply Chain Management is under constant evolution - the challenge is how best to manage inventory, or logistics sector to satisfy the current rising trend in the market demand coupled with supply constraints. The Supply Chain Managers have their task cut out today to maintain the customer service level by re-balancing supply with demand. This necessitates to build a multi-disciplinary team with a domain knowledge of materials management, to rigorously monitor the adaptability of an organization to the fast-changing supply side at the macro level. With this end in view, the participants will be taught the concept of integrated materials management, inter-relationship among various departments, flow of information and documents to make a seamless journey from Planning and Provisioning to Sourcing, Storing and Operations. The sessions on Logistics will help students identify modern warehousing with extensive use of automation, economizing transportation cost through consolidation and outsourcing. Adequate exposure of the students to e-commerce segment will help enhance the skill set of the supply chain professionals to appreciate the nuances of retail business.
